Python

Release

Feb 26, 2018

Global Information

To invite Noëlla to your own Discord Guild, click on the image down below!

In case you have issues or problems with Noëlla, you can always join the developers Discord.
Simply by using the command: `n!discord` or click here Join Noëlla's World.

Noëlla is an open source project, that is not so open source! *Make up your mind!!*.
Everyone can sent their issues always to Noëlla's Github on the Issues page.

If you wanna contribute something to Noëlla then you're always welcome!
You can always contact me Ashley or Join Noëlla's World.

Warning:

Noëlla is still in a pre-releases state.

Please file an Issues if you find anything wrong.

Or for all the lazy one under us, you can use: `n!feedback [message]`

Note:

Not all features in Noëlla are done or finished.

If you found an issue, please check the Issues section first before posting.

Getting Started

1.1 Invite Noëlla

Note:

By default Noëlla's invite, has preset Permissions.
Some of those are required to use Noëlla.

Inviting Noëlla is a piece of cake, you only need a couple things.
If you wanna invite Noëlla to your guild, you need permissions to do so.
The permissions you need to be able to invite Noëlla are `Manage Server` or higher.
If you're not sure if you have that, ask the server owner/hoster.

1.1.1 Roles & Permissions

To make sure Noëlla works fine without issues, you need to assign some permissions to Noëlla.
When you open the invite page of Noëlla, you see you can check and uncheck them.
The default invite link has a preset set of permissions Noëlla needs.

If you wanna change those, then be sure to know what you're doing.
If you dont know what you're doing, then ask someone else to help you.
Down below you see a list with permissions that is in the preset permissions.

	Required	Optional
Read Messages	X	
Send Messages	X	
Embed Links	X	
Attach Files	X	
Read History	X	
Add Reactions	X	
Use Extral Emojis	X

1.2 Setup Your Discord

No information yet, come back soon for more information on this subject.

Versions

Note:

This section is not always hundred percent up to date.

Since there are a lot of fix updates and other small updates.

Warning:

If you experience issues in the new `>overwatch` or `>hearthstone` command.

Please let us know with `>feedback` or on the Issues page.

2.1 Current Version

2.1.1 0.3.11.52

2.1.2 Added

- Badges Command (**>badges**) (*See a list with available badges*)
- Added badges to userinfo (**>info**) (*with this said, there will be a profile system soon*)

2.1.3 Changed

- Added: 30 seconds cooldown to some commands.
- Some other will get 15 seconds cooldown soon.
- Discord Bots has been updates, and applied to Discord Bot List.
- Added: New commans to Docs and Commands List

2.1.4 Fixed

- Typos on the Doc's

2.1.5 Extra

- Soon the Kawaii commands are going to be upgraded (further information soon)

- Soon there will be a profile system, with the badges and more (further information soon)

You wanna know more about the commands that were added?
Go to the *Current Commands* section, there you will find more information.
Was a command removed, you can find them also back in *Removed Commands*

2.2 Older Versions

0.2.93.67
0.2.93.32

Support

3.1 Different ways

If you have found an issue with Noëlla you can let the developer know that in multiple ways.
Some users like to get in touch with me personal through Noëlla's World (Support Discord).
Others do like it the more formal way, sending me an email or using the command `>feedback`.

So, if you wanna contact the developer, use the way what feels most comfortable for you.

3.2 Join Noëlla's World

So you want to join Noëlla's World, yeey!
Therefore there are some rules on our Discord, since Noëlla's World is more then only support.
The Discord started out as just a boring support server, and became also a social guild.

If you joined the discord, I wanna ask you to read the rules in the `#server-rules` channel.
You can join the discord by click here: Noëlla's World

3.3 Using Feedback command

So, you dont like to join that big discord guild? Thats totally fine!
You can use the command: `>feedback` on every server Noëlla is on.
You can also do it in a Personal Message to Noëlla so others wont see it!

The developer will or add you on Discord or sent you a message back through Noëlla
You can always mention what you prefer, the developer will keep that in mind.

3.4 NEW: Twitter

If you like to get social more involved with Noëlla, thats fine too!
You can always mention any issues or problems with Noëlla on her Twitter
or sent her a personal message, so the developer knows your issues.
Also the developer will try to keep the twitter page up to date (if possible).

Don't hasitate to take a look sometimes, maybe you will see something you like
while visiting Noëlla's twitter page!

3.5 GitHub Issues

So you're this pro coder person, that has a Github account.
Then you can always post a topic in the issue section on Noëlla's Github.
I probably don't have to explain you, what kind of information we need? Right?
If you never did that but still wanna do it. Try to post your issue so detailed possible

3.6 Support Links

Profile Banners

Note:

This page is under maintance.
If something is not working correctly, dont blame me! <3

4.1 What are banners?

You probably have seen some profile with a nice image on top of it?
Thats a profile banner, everyone can pick their own banner from a list with banners.
So, **you can't upload your own and that will never be an option**.

4.2 Available Banners

Features Information

Empty!

Current Features

> **Warning:**
>
> This section is not always hundred percent up to date.
>
> Since there are a lot of fix updates and other small updates.

6.1 Profile System

6.1.1 Intro

Since update `0.4.43.52` we added this new feature to Noëlla.
Profiles are a little different then you have seen in other bots.
Noëlla's profile system, allows you to be more open with information
For example, you can add your favorite anime or add your location.

6.1.2 How does it work?

It's very simple, what you have to do is invite Noëlla to your server.
Then you'll have to talk in the chat, this is most useless information ever! :P
Once you did that, you can lookup your profile with `>profile` (default prefix is >)
Yeey! now you see your profile!

You can also edit all the information that you see in your profile.
For example, you dont want your own Discord name as name in your profile
Then you can use `>profile setname NEWNAME` and you have succesfully updated your name.

For mor information, you can always use `>help profile` to see how it works.

6.1.3 Available Commands

Commands and aliases	Description	Usage
`>h profile` `>help profile`	Opens a embed with all the information about profiles.	`>h profile`
`>profile`	Open your profile or that from someone else.	`>profile` `>profile @name`

Placeholders Guide

Note:

This page is under maintance.
If something is not working correctly, dont blame me! <3

11.1 What are placeholders?

Placeholders are small pieces of code, that guild owners can use to fancy up
Messages such as `welcome messages` in Noëlla.
For example, a guild owner want to great a new user to the guild with a mention.
They can then setup a custom message that contains: `%USERMENTION%`.

This is an example used by the Developers Discord.

```
**Welcome to %GUILD%, %USERMENTION%.**
**Please make sure to read the rules in #server-rules :heart:**
**and our documention: http://noella.readthedocs.io/**
```

11.2 Available Placeholders

%USERNAME% - Places the username of the targeted user.
%USERMENTION% - Places a user mention of the targeted user.
%USERFULL% - Places a full name and descriminator of the targeted user.

%TIME% - Places the current time from the action.
%DATE% - Places the current date from the action.

%GUILD% - Places the name of the active guild.
%MEMBERCOUNT% - Places the amound of people at the action time.
