Object Data Mapper for Python
Quick overview to get up to speed with Odin.

- intro/creating-resources
- intro/loading-and-saving-data
- intro/mapping-between-resources
Working with resources

Resources are the basic building block of Odin.

- Resources: ref/resources/fields | ref/resources/options
- Loading and Saving: ref/codecs/json_codec | ref/codecs/yaml_codec | ref/codecs/csv_codec | ref/codecs/msgpack_codec
- Mapping: ref/mapping/classes
- Adapters: ref/adapters
- Documenting: ref/contrib/sphinx/index

See the examples/index section for examples on how to use features of Odin.
CHAPTER 3

Extras

- ref/contrib/money/index
- ref/contrib/geo/index
- ref/contrib/pint/index
CHAPTER 4

Integration

- integration/aws/index
- integration/django/index
CHAPTER 5
