
OpenAPI-Toolkit Documentation

Release 0.1.2

John Vrbanac

Feb 19, 2019

Contents:

1	API Documentation	1
2	Indices and tables	3

class `openapi_toolkit.OpenAPI` (*filename, spec*)
OpenAPI Specification Manager

find_input_schema (*path, method, content_type*)
Searches for a request body schema by path, method, and content_type

find_path (*path, method=None*)
Searches for Path data (incomplete)

classmethod load (*filename, preprocessor=None, resolve=True, validate=True*)
Loads an OpenAPI Specification from a file

save (*filename*)
Save the loaded OpenAPI specification to a file

class `openapi_toolkit.JsonSchema` (*formats=None, validators=None*)

validate (*schema, value*)
Validates a value against a schema definition

`openapi_toolkit.schema_format` ()
Decorator to add custom JSONSchema format checkers

e.g.

```
@schema_format.checks('uuid', ValueError)
def uuid_format(value):
    return uuid.UUID(value)
```

class `openapi_toolkit.MakoPreprocessor` (*directories=None, module_directory=None*)
Mako Preprocessor Handler

handle (*raw*)
Contractual handle method

CHAPTER 2

Indices and tables

- [genindex](#)
- [modindex](#)
- [search](#)

F

find_input_schema() (openapi_toolkit.OpenAPI method),
1

find_path() (openapi_toolkit.OpenAPI method), 1

H

handle() (openapi_toolkit.MakoPreprocessor method), 1

J

JsonSchema (class in openapi_toolkit), 1

L

load() (openapi_toolkit.OpenAPI class method), 1

M

MakoPreprocessor (class in openapi_toolkit), 1

O

OpenAPI (class in openapi_toolkit), 1

openapi_toolkit.schema_format() (built-in function), 1

S

save() (openapi_toolkit.OpenAPI method), 1

V

validate() (openapi_toolkit.JsonSchema method), 1
