
realmjoin-docs Documentation

Release 4.0.0

glueckkanja.com

Version 2019-09-13

Contents

RealmJoin is the perfect companion to [Microsoft Intune](#). Securely connect to the cloud and manage large Windows 10 ecosystems with software and policies - without any on premise servers or other local requirements. Manage devices and users no matter if work happens in corporate headquarter or at [Starbucks](#).

This is the old documentation repository. We keep it running to help people with old links to find the related information. But to get the latest documentation please switch to

[RealmJoin Docs on GitBook](#).
